FRANCESCO IANNONE INTERVIEWED • NIGHT SKIING IN SWEDEN

DESIGN PLUS YOUNG PROFESSIONALS

As well as highlighting products from established manufacturers, the Design Plus judging panel also gave a special mention to three student entries from the 'Young Professional' shortlist of future talent.

BEST OF

Lumierecrown Denise Hachinger

A reinterpretation of the classic chandelier, Lumierecrown comprises a petal-like arrangement of rectangular diffusers that hide the light source and produce a soft illumination. Like a flower, these petals can be opened out for a more dispersed light pattern or closed to create a more focused effect.
www.hachinger.com

Model 111 Bernhard Osann

Model 111 features a series of spots, inserted from above through circular apertures to create a ball-joint effect that allows each to be rotated as required. Each spot consists of three identical castings, which are interconnected with screws, holding the lamp in place.

BEST OF

BEST OF

Lichtraum-Raumlicht Marcel Schwegler

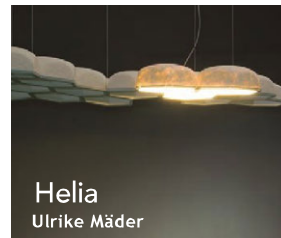

This sculptural streetlamp has integrated solar panels to feed current directly into the electricity grid. At night, the structure then draws power back to activate the concentric rings of LEDs that bounce light off the reflective underside of the shade to produce an 'indirectly illuminated flood of light'.
